

Campus-Classroom

Campus – Classroom system Bundle

Overview

During the last five years, people have higher expectations in technology and what it can do for them. The desire for “more and better” has grown exponentially. For example, in our homes we are no longer passively sitting in front of the TV, helpless staring at the screen. Now, interactive video games “like Nintendo Wii” have become the entertainment choice for individuals and families. Video on demand and Internet TV are growing rapidly. We believe that today's students are not satisfied to stare at static images drawn on a whiteboard or even projected on a screen.

*Interactive, Clear, sharp images and multimedia capabilities
Bring the “best in class” to the classroom. Become more funny and engaging*

We expect current information available instantaneously with the ability to interact with what is being shown to us in real time. Winmate knows the education market, and as a leader in technology, we can provide you with the new Campus Bundle – Digital Touch Wall Display that can communicate and interact in your classroom to engaging and interact with teachers and students. Now, we provide the size of touch wall display from 32 inch to 57 inch for the customers' applications.

Case Study

In November 2008, Chinese Culture University Account Management Course had built in Winmate 57 inch Digital Touch Wall Display and Accounting Software to improve the studying attitude and study the effectiveness of significant growth. Dr. Huang said: “This system which uses the interactive way to learn Account Management is the best idea to eliminate the boredom of course .

Benefits

High Resolution, get a big impact and lots of attentions

For teachers who need their message understood and remembered, Winmate Digital Touch Wall Display can enable educators to present class materials while sitting at a desk or standing at a podium, enabling them to face the class and actively engage students in the learning process.

Touch function, More Interactive. Improve the study efficiently

The touch interface is helping the students explore and master new ways to learn and communicate by interacting with shapes, symbols, pictures, sounds, maps, diagrams and drawings.

Easy to integrate with the school computers

Winate Digital Touch Wall Display provides VGA and Video input standard connectors. It can connect the teacher's computer to provide a total content solution package, allowing teachers to display class materials and education content directly on display.

Reduce shadows, cabling issue, Radiated heat and Fan Noise

Winate Digital Touch Wall Display is mounting on the Wall directly without projector and other power cable. Based on our solution, the customers didn't need to use a projector, so we provide the more green and quiet classroom or meeting environment.

Winate will continue investing in technology that supports the improvement of your learning environment, today and tomorrow.
